

Title:

Challenges and Complexities in the movement of Hazardous Materials

Abstract: This class is designed at the following experience level for this topic – **intermediate**

How does the Department of Transportation regulations intersect DoD TRANSCOM regulations in the movement of hazardous materials? This session will discuss a number of concerns:

1. Air shipment of lithium batteries
2. Significant difference DOD vs. DOT training standard for issuance of shipper's declaration and certification.
3. When is a Commercial Driver's License is required for transport of HazMat (vehicle type and placarding criteria)?

This session will update attendees on HazMat today, with facilitated group discussion of your HazMat transportation concern
