

Transportation University
NDTA-USTRANSCOM Fall Meeting

St. Louis Union Station
31 Oct – 2 Nov, 2016

Title: Documentation for IBS – CSS/ESS (TU 16)

Abstract: IBS provides SDDC the capability to electronically procure commercial transportation services for the global strategic deployment of DOD-sponsored cargo. IBS is complemented by PAT, a suite of business portals accessible by SDDC, shippers, and commercial carriers to support mission execution and the responsibilities specified in the Universal Services Contract.

This session will include an overview of SDDC's business systems with a specific focus on IBS and PAT.

NOTE: This class is designed for all experience levels for this topic.

Organization: HQ SDDC G6/IMA, Scott AFB, IL 62258

Website: Authorized users can access IBS and PAT through the ETA portal at: <https://eta.sddc.army.mil>

Instructors:

Tracey Stam, GS-13, HQ SDDC G6/IMA-OC, Project Manager of the IBS Electronic Shipper System and Commercial Sealift Solution.

Chris Heiby, GS-14, HQ SDDC G6/IMA-DI, Data Integration Branch Chief and Program Manager of SDDC's Business Support and Container Management systems.

Session POC: Christopher Heiby, christopher.l.heiby.civ@mail.mil, 618-220-5632, HQ SDDC G6

NDTA University Coordinator – Irvin "Irv" Varkonyi, DC NDTA, ivarkonyi@ndtahq.com, 703-863-9686, Skype IVarkonyi, Fairfax, VA
